PROFILE

Computer Science undergraduate at St Joseph Engineering College with a strong foundation in programming, data structures, and software design. Experienced in building full-stack and AI-powered applications across web and iOS, with a focus on clean, efficient code and practical, user-centred solutions. Eager to learn new technologies and contribute to collaborative engineering teams.

EDUCATION

Bachelor of Computer Science (2024 - 2028)
St Joseph Engineering College, Mangalore, Karnataka | CGPA: 8.25 / 10

Pre-University College (2022 - 2024)
K.V.G. Amarajyothi, Sullia | Score: 89.5%

PROJECTS

Review Lens AI
- Built an application that analyzes Amazon product reviews and generates concise summaries of key advantages and disadvantages using natural language processing.
- Helps shoppers make faster decisions without reading hundreds of reviews.

AI Resume Analyser
- Developed an AI-powered tool that evaluates a resume against a target job description and highlights missing keywords, skill gaps, and formatting issues.
- Generates actionable suggestions to improve ATS compatibility and overall resume quality.

FiTrack - iOS and Web Application
- Designed and built a cross-platform fitness tracking app for iOS and the web to log workouts, set goals, and monitor progress over time.
- Presents progress through clear visual summaries, with data kept consistent across both platforms.

EcoTrack - Carbon Footprint Tracker
- Created an application that lets users log everyday activities such as travel, energy use, and food choices, and estimates their carbon footprint.
- Visualizes emission trends and offers practical tips to help users reduce their environmental impact.

MediVault
- Developed a secure digital vault for storing and organizing personal medical records, prescriptions, and reports in one place.
- Focused on privacy, easy retrieval, and quick access to health information when it is needed most.

Personal Portfolio Website
- Built a responsive portfolio site using HTML, CSS, and JavaScript to showcase projects, skills, and achievements with a clean, interactive design.

TECHNICAL SKILLS

Languages: Python, Java, C++, C, SQL, R
Core Concepts: Data Structures, Natural Language Processing (basics), Data Analysis
Web: HTML, CSS, JavaScript
Libraries: NumPy, Pandas, Matplotlib

CERTIFICATIONS AND COURSES

- **Introduction to Generative AI** - NxtWave: foundational understanding of generative AI concepts, tools, and real-world applications.
- **Python for Data Science:** hands-on experience with NumPy, Pandas, and Matplotlib for data manipulation and visualization.
- **Introduction to Career Skills in Data Analytics** - LinkedIn Learning: core analytics concepts, tools, and workflows, plus data storytelling and communication.

SOFT SKILLS & LANGUAGES

Soft Skills: Teamwork | Time Management | Leadership | Effective Communication | Critical Thinking
Languages: English (Fluent) | Kannada (Fluent) | Hindi (Fluent)
